Senior Manager Business Process Re-engineering

Job Profile

- Analyze current processes to identify inefficiencies and areas for improvement
- Use innovative solutions and best practices to streamline the operations, reduce waste and increase efficiency
- Develop and communicate a clear vision for process re-engineering efforts, ensuring buy-in and support from senior management and key stakeholders
- Leading and implementing strategic process improvement initiatives across the organization
- Ensure end-to-end process re-engineering projects, from initial assessment and analysis to implementation and post-implementation review
- Develop project plans, timelines and resource allocation strategies to ensure successful project delivery within scope, budget and timeline constraints
- Utilize advanced methodologies and tools to redesign processes for optimal efficiency and effectiveness.
- Develop and implement change management strategies to facilitate the adoption of new processes and drive organizational change
- Engage with stakeholders at all levels of the organization to gather insights, address concerns and foster a collaborative approach to process improvement
- Establish performance metrics and KPIs to measure the effectiveness of re-engineered processes
- Build a high-performing team culture, promoting collaboration, accountability and excellence in execution

The successful candidate will be provided with an attractive remuneration package, commensurate with benchmarked financial institutions.
