Senior Assistant Manager Business Process Re-engineering

Job Profile

- Assist to conduct comprehensive analyses of existing business processes to identify inefficiencies, bottlenecks and areas for improvement
- Collaborate with stakeholders from different departments to gather insights and understand process pain points
- Utilize various tools and methodologies to assess process performance and effectiveness
- Design new process workflows, procedures and protocols to streamline operations and enhance productivity
- Develop implementation plans, including timelines, milestones and resource requirements
- Provide guidance and support to stakeholders during the transition phase, ensuring smooth adoption of new processes
- Monitor process performance and identify opportunities for further optimization and refinement
- Lead continuous improvement initiatives to drive ongoing enhancements and efficiency
- Document all aspects of re-engineered processes, including workflows, standard operating procedures (SOPs) and guidelines

Applicant's Profile

- Bachelor's degree in Business Administration, Finance, Engineering or related field
- Proven experience of (05) five years in business process analysis, redesign and optimization, preferably within the banking or financial services industry
- Strong analytical skills, with the ability to identify problems, analyze data and develop practical solutions
- Excellent project management skills, with the ability to manage multiple projects simultaneously and drive them to successful completion
- Effective communication and stakeholder management skills, with the ability to collaborate and influence across different levels of the organization
- Adaptability and resilience in managing change and navigating through complex organizational dynamics

The successful candidate will be provided with an attractive remuneration package, commensurate with benchmarked financial institutions.
